jointly

Care together
from anywhere!

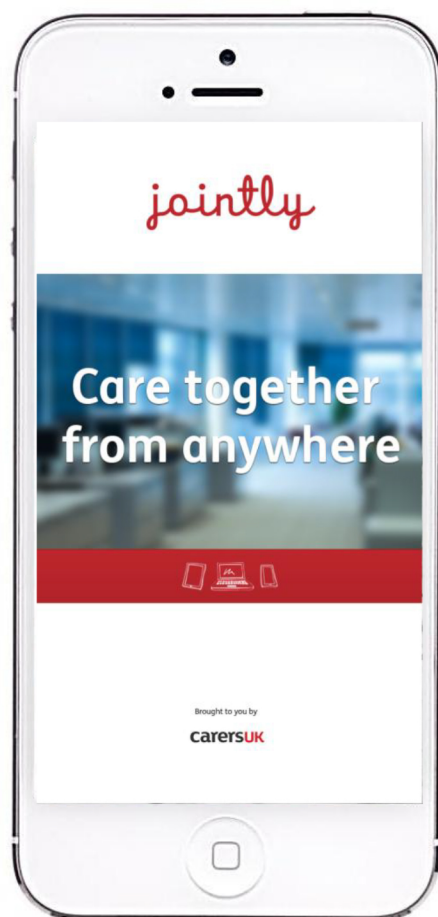

Jointly is an innovative mobile and online app designed to support carers. It makes your caring a little easier, less stressful and a lot more organised by making communication and coordination between those who share the care as easy as a text message.

About Carers UK

Jointly has been developed by Carers UK. Carers UK works to make life better for the millions of people who look after a loved one. This includes looking how technology solutions can help carers.

Jointly has been designed in consultation with carers and brings together key features in a single tool.

Forward thinking employers and service providers (such as Local Authorities) are offering **Jointly** to employees or members of the public who are looking after a loved one.

Key features

- ✓ Simple, intuitive group communication
- ✓ Calendar
- ✓ Medication list
- ✓ Tasks/lists
